

Cyllisphere

THE SPHERE OF INTELLIGENT SOLUTIONS

COPILOT READINESS ASSESSMENT

Know what stands between your organization and a safe Copilot rollout.

A structured review of your Microsoft 365 environment that turns licensing, identity, data, and security questions into a clear, prioritized path to deployment.

SMBs

School districts

Municipalities

Find the gaps before Copilot finds the data

Copilot can work with everything each user is already permitted to access. We assess the controls around that access before you begin a pilot or purchase licenses at scale.

Licensing prerequisites

Eligible Microsoft 365 plans, tenant readiness, and the right licensing path.

Identity and access

Microsoft Entra ID controls, roles, authentication, and access hygiene.

Data governance

Oversharing exposure, permissions, ownership, retention, and content sprawl.

Information protection

Sensitivity labels and data loss prevention (DLP) coverage.

Security baseline

Core policies and safeguards needed to support a responsible Copilot pilot.

A decision-ready package

- 1 Readiness scorecard**
Clear status across each assessment area.
- 2 Remediation roadmap**
Prioritized actions, owners, and sequencing.
- 3 Pilot plan**
Recommended cohort, guardrails, and success measures.
- 4 Licensing quote**
A right-sized Copilot quote from Cyllisphere.

A focused path from discovery to pilot

Typical timeline: 7-10 business days

Discover

01

Confirm goals, users, current licensing, stakeholders, and access to the right tenant information.

Assess

02

Review the five readiness areas, identify exposure, and validate what must be fixed before rollout.

Plan

03

Present the scorecard, roadmap, pilot design, and licensing quote in a leadership-ready readout.

PRICING

Complimentary for qualified organizations

For organizations actively evaluating Microsoft 365 Copilot. Qualification and final scope are confirmed during intake.
